

The Next Generation of Professional Grade Deck Board *TESTED and CERTIFIED VEKAdeck*

See ICC-ES Evaluation Report No. 1469 at www.icc-es.org

VEKAdeck™

Reinforced Cellular PVC Deck Board from VEKA Innovations

888-Go4-VEKA • www.veka.com

ICC Evaluation Service, the leading source of technical information on building codes, building products and building technology, has evaluated residential use of 100% solid vinyl VEKAdeck™.

VEKAdeck™ has been tested for structural properties, durability and surface burning characteristics, and has been shown to be a superior decking surface when installed in accordance with local building codes. VEKAdeck™ is an alternative to both preservative-treated and naturally durable lumber, and has the added benefit that it may be used in direct contact with the ground. VEKA's own field-testing has shown the product to be color-fast, so the color integrity is warranted over the life of the material.

It's not a composite...it's tested and certified VEKAdeck™.
