

The SwingView™ Classic Entry Door from VEKA is elegantly designed and solidly built from maintenance free reinforced vinyl lineals that are mechanically fastened to create the look of a traditionally built entry door.

You may select from white or beige vinyl and combine cherry, light/dark oak, or our stainable oak interior finish. To create a more open and airy feel, combine transoms and flankers to create a wall of light that will welcome you home every day.

Typical SwingView™ Classic entry door combinations. Availability is not limited to the samples shown here, consult your dealer for size and configuration availability.

The SwingView™ Classic Entry Door is the perfect solution for an attractive, secure and low maintenance entry system. The UV resistant vinyl lineals are produced by VEKA Inc., the worlds largest producer of vinyl extrusions for window and door systems. The hollow chambered lineals, which act as dead air insulators, are reinforced with .094 gage aluminum for added strength and rigidity.

Choose a color combination that suites your needs
