

FEATURES and BENEFITS

- Wood applied to sash and frame interior.
For the rich warm look of an all wood window.
- Extension jambs for 4- $\frac{3}{4}$ " and 6- $\frac{3}{4}$ " walls.
Allows for ease of installation.
- Integral interlock.
Forms a tight weather seal at meeting rail.
- Flush mount tilt latches.
Allows for ease of cleaning.
- Interior wood for mulls.
Maintains the all wood look.
- Wood lift at lock rail.
Typical of traditional wood product.
- Welded frame and sash.
Superior in strength compared to mechanical built systems.
- 3/4" insulated glass in new construction systems.
Superior to typical 5/8" IG units used in many wood windows.
- Accepts full screen or sliding half screen.
Complete ventilation and insect control.
- Fusion welded sloped sill.
Allows for water drainage.
- Integral welded nail fin.
For new construction application.
- Face mount accessory grooves.
Accepts optional J-channel or heavier brickmolds.
- Unique patented wood attachment.
Eliminates adhesive or fastener failure.

TimberView™ comes standard in white or tan vinyl. Also available in exterior METREC® color options such as almond, beige, burgundy, bronze, cocoa, champagne, hunter green or terratone.

Tilt-latches allow for effortless tilt-in for ease of cleaning unlike the more difficult to operate breakaway jamb liners.

i n s n i

expressive refined

The TimberView™ looks like a real wood window because it is a real wood window, and it can be stained or painted to suit any decor. Other features include block and tackle, spiral or constant force balances, surface mounted or recessed locks, wood lift operator at center rail and tilt latches for easy cleaning. The TimberView™ ShadowWood™ system option eliminates the jamb liner aesthetics. Full integral hidden vinyl interlock ensures a tight weatherseal. Options include snap on wood grids for the interior and maintenance free rigid simulated divided lights for the interior and exterior as preferred.

TimberView™ Window

Is it a wood window...or is it a vinyl window?

Finally, a unique window system that takes advantage of both and that's what makes it different.

It's TimberView™ by VEKA.

b r e a k

P A

TimberView™...something uni

Admire the curb appeal of a window with an all welded vinyl rigid exterior...along with the natural warmth and selling power that only a real wood interior can offer.

Capture the intrinsic elegance of natural real wood grain. Choose from pine, poplar, maple, oak or cherry.

e l e g a

The TimberViews wood interior members are milled and assembled to give you the traditional wood window appearance. The patented mounting system allows the wood to float on the extruded profiles. This method eliminates the need for

adhesives or mechanical fasteners that can bow or fail over time. This float method, unlike capping or cladding of a wood window with vinyl or aluminum, eliminates possible moisture build on the wood beneath.

que from VEKA

TimberView™ ... distinctively different

Imagine your product offerings re-energized...differentiated with a patented new product. Contemplate a unique system with the "curb appeal" of true wood designs... but made with rigid welded frames and sashes. Now consider the selling power that only a richly stained or painted real wood interior can offer. You are envisioning TimberView™, the innovative new window system that is designed to be different.

The TimberView™ patented window system couples the interior warmth of real wood windows with the exterior low maintenance advantage found in all welded vinyl systems. Distinctive features such as rigid vinyl simulated divided lights, snap in grids, the optional METREC® exterior color palette and custom hardware further enhance this program. Add VEKA's years of product development plus marketing knowledge to your own fabrication and customer service experience then just think of how different your program can be. And remember...differentiation commands margin. So, look at the TimberView™ program... recognize how patent protection can preserve your investment.

TimberView™ ...different...period.

Capture the intrinsic elegance of natural grain and texture. Painted wood windows have a traditional appeal that's unique and can be refinished any color to match any change of decor.
